

Classroom Device Guide For Parents

Created by B4 U Click

Smartphones

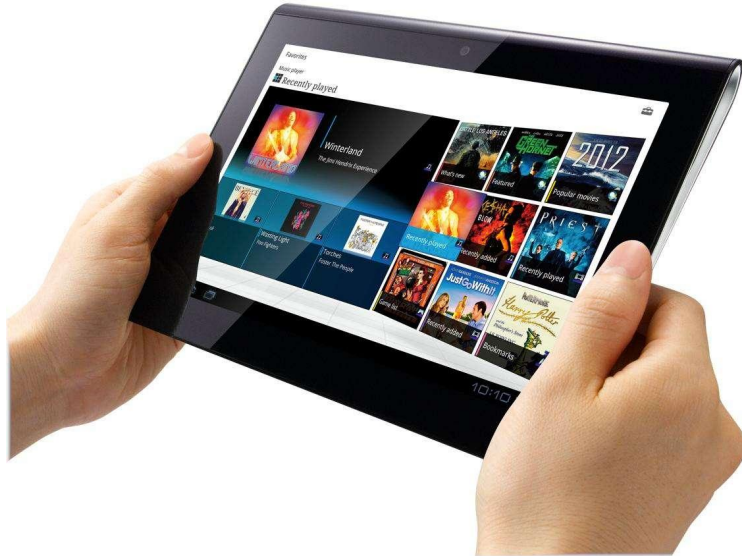

Smartphones are mobile devices that can conveniently fit in pockets so students can transport them easily. Apps offer a variety of tools to help students with homework, productivity, schedules, and communicating with teachers. Depending on usage, smartphone batteries last 4 to 8 hours.

Device	Average Price
Apple iPhone 6S Plus	\$749.00
Samsung Galaxy S6 Edge +	\$768.00
Google Nexus 6P	\$499.00

Tablets

Tablets are considered to be bigger and more powerful smartphones. Tablets offer the same tools and features as a smartphone but have a larger touch screen that makes the device use-friendly in the classroom. They are lightweight and fit securely into backpacks. Tablet battery life can range between 8 to 13 hours.

Device	Average Price
Apple iPad Air 2	\$599.00
Google Nexus 9	\$449.00
Amazon Kindle Fire HD	\$249.99

Laptops

Laptops are considered the powerhouse of mobile computers. They have the same features as a personal desktop computer but can fit into a backpack. Automatic wi-fi connections make these devices easy to set up in a classroom. Laptops have batteries that can last between 9 and 20 hours, depending on usage.

Devices	Average Price
Apple Macbook Air	\$999.00
HP Pavilion 15	\$549.99
Dell XPS 13	\$749.99
